Zany Brainy Science - All New Activities for 2019

Our teachers guide children to explore the physical world in which they live and make their own scientific discoveries! Intriguing, hands-on experiments cultivate children’s natural curiosity, develop their science and math knowledge, and build universal cognitive and social-emotional skills.

Science is the effort to discover and increase human understanding of how the physical world works. Young children engage with science when they are stimulated to think for themselves and explore their world. *Zany Brainy Science* takes an investigative approach to introducing young learners to the magical world of science.

****Please complete this registration form by December 7th****

Zany Brainy Science	Monday's 10:30-11:15	\$140.00 per session
Ages 3-5 years	Jan. 7, 14, Feb. 4, 11, 25 March 4 (Make up if needed March 11)	Minimum 6 students Maximum 15 students
