Welcome!

As a continuation of our Links to Learning® curriculum, camp offers a fun-filled summer program for children ages 1 to 5. Each week, preschoolers jump into action, participating in fun and exciting activities and special events.

Our preschoolers have the opportunity to expand their horizons during the summer, embarking on new adventures, and having fun!

Although we want the children to have the best summer possible, we can't forget about all they've learned during the school year.

Our Links to Learning® summer curriculum is designed to review and strengthen skills taught during the school year. Various academic activities will be integrated throughout your child's daily summer experience.

Our camp program will inspire your child's mind to engage, explore, create and stay active this summer!

Summer Preschool Schedule

Older Infants/Toddlers: \$30

Beginners – Pre-k 1: \$125

Half Day: \$75

Weekly Activities

Going Green

Our campers will explore fun ways to recycle and keep our planet clean through literature, art and sensory activities.

Hands Around the World

Campers will go on an adventure around the world by learning about different cultures and discussing heritage. We can't wait to celebrate what makes each of us unique!

Brain Games

Our campers will show off their problem solving skills and practice their fine motor skills through puzzles, word games, mathematics, sorting, stacking and more.

Express Yourself

Self-expression is not only important for preschool development, but it is also a lot of fun. Our campers will express themselves through music, drama and dance.

Tinker Around

Campers will gain an understanding of how simple machines work by engaging in hands-on activities that allow them to see what goes on inside. Campers will then use that knowledge to invent and design some ideas of their own.

Inventing The Future

Campers will embark on an imaginative journey, as they learn about the solar system and space travel. They also will have the opportunity to invent a futuristic world where anything is possible.

Like a Champion

We will celebrate and get to know the helpers in our community. Our campers will also discover small ways that they too can be champions in their neighborhoods!

STEAM Squad

Campers will discover a magical place where science, technology, engineering, art and math come together to ignite curiosity and problem solving skills.

Color Me Happy

Explore the wonderful world of color! From painting, to sculpting, to drawing and more, campers mix colors and let their creativity run wild.

Growing Greatness

Campers investigate all aspects of mother nature including weather, bugs, and habitats. Their green thumbs will be put to the test as they create their own mini gardens and learn about the life cycle of plants.

Chef in the Making

Campers practice a variety of kitchen skills while creating delicious concoctions. Along with habits of self-help and good nutrition, they learn important academic, social and physical skills.

Time to Fly

It's a bird, it's a plane...it's learning about how things fly! Whether it is a butterfly or a kite, we are getting into the science behind what it takes to fly.
